

Exploratory Data Analysis
Chris Byrnes MVP
Due: Tues., March 30, 2021

Chart:

Description:

The above illustrates total daily (weekdays only) ridership for Bronx MTA stations by line during August 2019 - October 2019. This allows me to get a good picture as to where to focus my attention in order to recommend five stations near Yankee Stadium to use as cost effective set locations for the film. Next step is to look at daily averages in order to factor in differing number of station per line. Once an MTA line is finalized a bar chart showing ridership for each station will lead to final recommendations.
